**Subject:** Metal Elements Product Changes

Dear Customer,

Pall Corporation prides itself on offering a range of high-performance filtration solutions for our customers. To ensure we do this as efficiently and effectively as possible, we periodically review our product portfolio to remove those products with lower customer demand. This enables us to focus on supporting our customers' most important needs for today and the future.

Starting December 19<sup>th</sup>, 2025, we will no longer accept orders for a select list of part numbers within our Metal Elements product family. Attached to this letter is a list of part numbers that will be discontinued. Existing orders will not be affected and will be fulfilled as confirmed.

Prior to making these decisions, we always seek to find alternative products that meet our customers' needs. In some cases, we can offer an alternative product for the discontinued option you are currently using. Your local sales representative will be able to offer more information about the various options and their suitability for your application.

Thank you for your partnership with Pall Corporation. Please do not hesitate to contact your Pall Sales or Customer Service Representative with any questions or concerns.

Best regards,

*Greg
